OBJECTIVE

Looking for a developer with DevOps, project & product coordinator role where I can grow and contribute to real-world projects. I'm passionate about building software especially Web3 and have hands-on experience building scalable application, web apps, backend microservices, system design, smart contracts, dApps, DeFi apps & APIs with databases and cloud deployment. I also have experience managing projects using agile SDLC scrum framework & DevOps practices. Excited to join a team where I can keep learning and grow

TECHNICAL SKILLS

- **Basic Programming** - JavaScript/TypeScript, Golang, C/C++, SQL/NoSQL, Solidity
- **Frontend & Backend** - React, Next, TailwindCSS, RadixUI, shadcnUI, Firebase, Golang (gin)
- **DevOps** - Git/GitHub, GitHub Action CI/CD, Docker, AWS CloudOps, Vercel, Cloud watch
- **Project Mangement** - Agile, Scrum, Jira, Notion, Sprint plan/backlog, Sprint review, Gantt chart
- **Blockchain** - Thirdweb, Hardhat, Mocha/Chai, Alchemy/Infura, IPFS, OpenZeppelin, EVM
- **AI Models** - Cursor AI, Claude AI, Github Co-Pilot , v0dev, Kiro
- **APIs & DB** - MySQL, MongoDB, RESTAPIs, Microservices, System design, Postman

PROFESSIONAL EXPERIENCE

Thirdweb Software Development - USA, Kuwait (remote) *Software developer & Project coordinator | June, 2025 - Present*

- Work with clients to build products, dApps, frontend and scalable backend system using cutting-edge Web3 tools and infrastructure, NFT marketplaces & staking systems
- Regularly use Thirdweb's SDK, smart contract tools for infrastructure, development and deployment.
- Led multiple full-cycle Web3 projects including design, architecture, deployment, testing and team coordination with DevOps, QA using agile/scrum with standups.
- Integrated Thirdweb features such as auth, backend, db, APIs, NFT drops, marketplace modules
- Collab with product owner and scrum master to plan sprints and prioritize features.

Lazarus Mint (remote) *Software developer & Founder | May, 2025 - Present*

- Defined product vision and feature roadmap from MVP to launch acquired 100+ users
- Designed system architecture & development (frontend, backend, smart contracts, APIs & DBMS)
- Built full-stack dApp, microservices, scalable backend & web app using React, Next, TailwindCSS, Firebase, Go, MySQL, MongoDB, Thirdweb (ERC1155) APIs, Docker, CI/CD pipeline with AWS.
- Built auth & wallet login (MetaMask + Wagmi + RainbowKit) & NFT backend logic
- Wrote and tested smart contracts; integrated real-time Firestore DB and RESTAPIs
- Dockerise & Deployed via GitHub Action CI/CD + Firebase Hosting with unit & integrated testing
- Managed Project mangement, UI/UX, Development, QA, DevOps and early user feedback loops

FutureTEC - Kuwait (on-site) *Jr. Developer & Project coordinator | December, 2022 - October, 2023*

- Managed sprint planning, task breakdowns, and team workflows using Jira facilitated agile ceremonies: daily standups, retrospectives, and weekly reviews with the team
- Tracked and monitor progress, resolved blockers, and ensured timely delivery.
- Worked with developers, QA, DevOps & project leads to maintain product & project goals.

PROJECTS

Full-Stack web-app-pos with NFT Marketplace

[GitHub](#) [Live](#)

- A modern Point of Sale (POS) system with NFT based customer rewards and an integrated NFT Marketplace — built for retail businesses looking to reward loyal customers with digital assets.

DeFi Staking app

[GitHub](#) [Live](#)

- A DeFi staking app (Decentralized Finance staking application) is a full-stack decentralized application that enables users to interact with financial services on the blockchain—without intermediaries.

Crypto wallet tracking

[GitHub](#) [Live](#)

- This bot tracks Ethereum whale wallets and sends real-time notifications about wallet balances and transactions via Frontend UI with Telegram and Discord.

AI Product full-stack web-app

[GitHub](#) [Live](#)

- AI Product website for startup

EDUCATION

2022 - 2025 | The University of Bolton - London, UK
Bachelor of Computer Science - Software Engineering

PERSONAL STATEMENT - WHY YOU SHOULD HIRE ME

- I combine **full-stack and blockchain development with project coordination, design, QA and DevOps** driving products from idea to deployment as a solo builder.
- I leverage **AI tools and automation** to accelerate development, reduce bottlenecks, and ship MVPs faster with consistent quality. **using modern tech stack and AI tools.**
- I have **built and scaled web3 startups, real-world projects and open source contribution with reduced MVP launch time by 40% using AI-assisted dev tools**

ADDITIONAL INFORMATION

- Languages: English, Arabic, Urdu, Hindi
- Interests: Web3 hackathons, Exploring AI-assisted development tools, Startup building
